

SUNLINE SYNERGY

800 *SERIES*
FRAMED

800 SERIES FEATURES

Sunline Synergy 800 Series is a 3/16" (5mm/single panel) or 3/8" (10mm/double panel) glass solution with a minimalist recessive design that integrates organically with other modular wall systems along with traditional construction.

STYLE / VALUE

Full height partition is either a double or single-glass wall system, that is custom cut for a perfect fit. It achieves a minimalist look with minimal impact on your budget. As a modular solution it also depreciates faster than drywall, so you see tax benefits sooner.

ROOM DIVIDER / GLASS FRONTS

Can be used either floor-to-ceiling or any height below the ceiling to create an entire enclosure or applied as a glass front to spaces made with conventional architecture. The system works with tempered glass - both clear and frosted. Panels span up to 10 feet (3m) without additional vertical support.

DESIGN PHILOSOPHY

Anodized aluminum frame solid construction builds a safe and secure wall. The beam profile and frame are edged or bordered with black feature strip to make it very clean, spacious, and uncluttered. The full-glass panels and swinging or sliding door options offer a crisp, clean view as they optimize the space and make the office appear clearer and brighter. Add sleek, adjustable window blinds for privacy.

AFFORDABLE FLEXIBILITY

The installation is simple and quick. The panels arrive fully assembled, with a unique corner connection that makes initial assembly or future reconfiguration fast and convenient.

DESIGN OPTIONS

- Walls are available in clear or frosted glass, whiteboard, fabric, back-painted, and laminate.
- Frame options include anodized aluminum and painted steel.
- Door options include full-glass, half-glass, and laminate swinging and sliding doors.
- Adjustable window blind option is available.

SIZE OPTIONS

- **Widths** (in): 18, 24, 28, 32, 36, 39, 48
- **Widths** (mm): 450, 600, 700, 800, 900, 1000, 1200
- **Heights** (ft): 7, 8, 9, 10
- **Heights** (mm): 2100, 2400, 2700, 3000
